Supersession

- At NAB 2019, the presentation stage will be the main focus of the IP Showcase, with expanded seating and placement front and center in the IP Showcase booth.
- At previous shows, the IP Showcase has attracted hundreds of attendees each day – often with standing-room-only crowds.
- **End users, industry associations, solutions providers and technology developers are all invited** to share their knowledge and perspectives on how this fundamental change will impact the industry today and in the future.
- **Case studies** of IP media deployments from around the globe will be featured, allowing visitors to see real-world examples of how other organizations have deployed IP media technologies.

IP Showcase Theater Call for Speakers NAB 2019 due: March 1st
